

Homeschooling Parent Guide

How to set up a calm, effective learning routine at home

Welcome to homeschooling

Homeschooling works best with a simple routine, a dedicated learning corner and lots of encouragement. This guide gives you a practical plan you can start this week. You do not need to be a teacher — our lessons, videos and task books guide you step by step.

Set up a learning corner

- A table and chair at the right height, with good light.
- A small shelf for task books, stationery and a water bottle.
- Keep phones and TV away during lesson time.
- A wall chart for the weekly timetable and a star chart for rewards.

A sample daily routine (ages 5–9)

Time	Activity	Tip
9:00	Morning circle — date, weather, prayer/du'a	Keep it short and fun
9:15	English — phonics or reading (video + task book)	20–30 minutes
9:50	Movement break / snack	Go outside if possible
10:10	Maths — lesson video, then 1–2 task book pages	Use real objects to count
10:50	Urdu / Islamiyat	Read aloud together
11:20	Science, art or a hands-on project	Follow the activity book
12:00	Free reading & lunch	Let your child choose a book

Tips that make a big difference

- **Short sessions:** young children focus for about their age + 5 minutes. Take breaks.
- **Praise effort,** not just correct answers: "You tried really hard on that!"
- **Same time every day:** routine reduces arguments and builds habits.
- **Read every day** — even 15 minutes of reading together builds vocabulary.
- **Use the app:** mark lessons complete, check quiz scores and teacher feedback.

How we support you

Your child's teacher reviews assignments and gives feedback in the app. Attendance, results, fee vouchers and announcements all appear on your parent dashboard. Message us on WhatsApp any time you need help.
